Dear David

ASSESSMENT OF STATISTICS ON IMMIGRATION

Thank you for the correspondence outlining the actions that have been taken to address the requirements in Assessment Report number 177 Statistics on Immigration.

The Board of the Statistics Authority has reviewed these on the advice of the Assessment team and I am pleased to confirm the designation of the outputs as National Statistics.

I note the steps that you have taken to improve the interpretability of the statistics in response to the Requirement in the Assessment Report. I think it would be a helpful aid to accessibility (hence interpretability) if you were to review the overlaps between the content of the key points on the webpage and the statistical news release, and improve how these summaries direct the reader to the more detailed statistics. On this basis designation is confirmed.

It is a requirement of the Statistics and Registration Service Act 2007 that the Code of Practice must continue to be complied with in relation to the statistics. We would invite you to incorporate the attached text in publications containing the statistics. This text may only be used where National Statistics designation has been awarded following an Assessment Report. It is intended to convey a strong and independent endorsement for the statistical publication.

Please feel free to discuss any aspect of this with us at any time. I am copying this letter to Jil Matheson, the National Statistician, and David Matz.

Yours sincerely

Richard Alldritt

Text that may only be used in publications that carry the National Statistics logo following assessment and designation:

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods, and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.
